HOW TO FIND YOUR NECKLACE SIZE

DETERMINING THE RIGHT SIZE FOR YOUR NECKLACE:

The best way to find the right length for your necklace is through measuring it with a string and comparing the length with a ruler (in cm). Alternatively, you could also measure the length of your favorite necklace.

> Tight fitting necklaces, called Choker: Choker should fit tight around your neck and are normally between 32 and 36 cm long.

> Basic necklaces, called collar: our modern everyday necklaces are 39 cm long with an additional 3 cm extension eyelet through which you could wear your necklace up to a length of 42 cm. On request we can also produce the necklace in a 42 cm length (+3 cm). This is more of a classic version, called Princess.

> Chest necklaces, called Matinee: These necklaces are generally between 60 and 65 cm in length. Here the size of your chest is the deciding factor.

> Double necklaces (Doppel): These necklaces can be wrapped twice around your neck. Our rope necklaces are between 100 and 105 cm in length.
